Hi Woody,

6-24-2024

Thanks again for taking the time to chat with us and take a photo. Jennifer truly loved building this box. She was so proud of herself for being able to follow your amazingly detailed and simple directions, and even do things like add working hinges to it!

The work you're doing and the projects you're building for kids like Jennifer have such a lasting impact. She went home and immediately told her twin sister all about getting to build something in clinic all by herself.

You've created projects that allow the kids to be occupied during long clinic visits, while also giving them a sense of pride and accomplishment at what they've built with their own hands. These projects, in combination with Jane's (*child life specialist*) ability to touch on emotions and feelings surrounding a child's diagnosis and treatment, are such an important part of their cancer journey.

We feel so, so fortunate to have seen the benefits of your work firsthand. Thank you for all that you continue to do!

With much gratitude,

Mary (Jennifer's mom)
Jennifer (age 9)

Jennifer and Woody
